

ANURAG KUMAR TRIPATHI

AI Product Manager

☎ +91 8979975078 • ✉ anurag@anuragtripathi.pro • 📍 Gurugram, India • 🌐 [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

SUMMARY

AI Product Manager with 6+ years of experience spanning software engineering, 0-to-1 product ownership, and end-to-end AI product development. Founder of an AI product studio, independently shipping multiple production-grade AI tools adopted by 1,000+ users across 30+ countries with zero paid acquisition. Deep expertise in generative AI, LLM product design, RAG architecture, model evaluation, and human-in-the-loop systems. Proven ability to translate complex technical capabilities into OKR-driven roadmaps, measurable business outcomes, and intuitive user experiences.

SKILLS

AI Product: LLM Feature Strategy, Model Evaluation, Prompt Engineering, Output Quality Standards, RAG-based Search, Human-in-the-Loop Design, Generative AI, AI Behaviour Definition

Product Management: Discovery & User Research, PRDs & User Stories, Roadmap Planning, MVP Scoping, KPIs/OKRs, Wireframing, Stakeholder Management, Go-to-market Strategy, Feature Prioritisation (RICE, MoSCoW)

Analytics: SQL, A/B Testing, Google Analytics, Mixpanel, Funnel Analysis

Technical: Python, Java, Git, REST APIs, Jira, Figma, Supabase

Execution: Agile, Scrum, Sprint Management, Cross-functional Collaboration

EXPERIENCE

Next Square Technologies

Gurugram, India

AI Product Manager

Dec 2023 - Present

Owned end-to-end product delivery of an internal AI productivity tool for a consulting & SaaS delivery team, embedding LLM-powered workflows to reduce manual documentation overhead and improve output consistency

- **Scoped the AI opportunity:** Conducted 6 structured discovery interviews with consultants and delivery managers; mapped high-frequency manual tasks against AI suitability and built an opportunity matrix that became the product roadmap foundation.
- **Defined output quality and prompt standards:** Engineered prompt templates for 3 use cases (status reporting, SOP generation, client docs) and established written pass/fail evaluation criteria; reviewed 12 pre-launch output samples per use case before sign-off, establishing a lightweight model evaluation process.
- **Designed human-in-the-loop guardrails:** Made explicit product decisions on where AI required mandatory human review, especially for compliance-sensitive content, documented as a product policy rather than a user setting.
- **Drove adoption and closed the feedback loop:** Onboarded 3 delivery teams; maintained a post-launch output failure log tracking AI errors by type, directly informing the v2 backlog and earning senior leadership approval for the next cycle.

Xenriq Systems - AI Product Studio

Remote, India

Founder and AI Product Manager

Feb 2025 - Present

Concurrent venture alongside full-time PM role. Independently conceived, built, and shipped 3 AI-native products from zero to production.

- **Promptive Sentry for IDE – VS Code Extension:**

Built and shipped *Promptive Sentry*, a 5-star VS Code extension adopted by 1,000+ developers within 1 week of launch via organic growth, featuring a silent 7-layer context pipeline (<800ms) that reduces AI prompt iteration time by 60% and eliminates manual context formatting at the IDE layer.

- **Promptive Sentry Chrome Extension:** Launched a dual-engine browser extension adopted by 1,000+ users across 25+ countries in 3 weeks, addressing context loss for Claude/ChatGPT power users. Three engines: (1) Prompt Enhancement — one-click structured, role-defined prompt rewriting; (2) Sentry Memory — AI-readable context handoff resumable on any platform; (3) Claude Usage Monitor — real-time 5-hour and 7-day quota tracking. Zero data retention, no account required.
- **Pique - Windows Ambient AI Assistant:** Architected an ambient AI assistant (Electron + TypeScript) featuring single-hotkey screen capture and push-to-talk voice AI with <200ms streaming transcription latency. Architected a multi-model pipeline (Claude, Gemini, GPT) with two-pass coordinate refinement, powering the product's Private Beta launch.

Aithent Technologies

Senior Software Engineer

Gurugram, India

Dec 2022 - Sep 2023

Worked at the intersection of engineering and product, contributing to LLM-assisted user-facing features and owning the evaluation framework that measured their real-world performance

- **Shipped LLM-assisted help experience:** Partnered with product and design to launch an intelligent search feature with contextually suggested answers, reducing support ticket volume by 12% and increasing self-service usage by 10%.
- **Built a model evaluation framework:** Introduced structured quality measurement using click-through rate, helpfulness ratings, and fallback frequency as signals; iterated on response grounding and prompt structure based on real usage data - not just user sentiment.
- **Improved reliability:** Reduced recurring incidents by 22% through monitoring, SLOs, and structured incident review processes.
- **Bridged product and engineering:** Collaborated on PRDs and technical specs for AI features, translating business requirements into implementations aligned with the product vision.

Xoriant Solutions Pvt. Ltd.

Software Engineer

Gurugram, India

Nov 2021 - Dec 2022

- **Drove measurable adoption:** Owned delivery of an intelligent spending categorisation and trend analysis feature that reached 20% DAU within 3 months, becoming a top-3 engagement driver on the platform.
- **Strengthened product process:** Partnered with PMs to define PRDs, user stories, and acceptance criteria, ensuring delivery aligned with product strategy.

Hexaware Technologies

Associate Software Engineer

Gurugram, India

Jun 2019 - Nov 2021

- **Improved customer outcomes:** Synthesized insights from user interviews, support tickets, and surveys to sharpen backlog prioritisation, contributing to a 20% improvement in CSAT scores and improving user retention.
- **Built operational dashboards:** Designed and deployed real-time KPI dashboards (Java, SQL) that improved operational efficiency by 30% and enabled data-driven stakeholder decisions.

EDUCATION

University of Petroleum and Energy Studies, Dehradun, India

Jul 2015 - Jun 2019

B.Tech in Computer Science and Engineering

PRODUCTS BUILT – XENRIQ SYSTEMS

Promptive Sentry for IDE – VS Code Extension

- 1,000+ active developers globally | 5-star rated | 2 week post-launch

Promptive Sentry – Chrome Extension

- 1,000+ users | 5-star rated | 30+ countries | 3 weeks post-launch

Pique – Windows Ambient AI Assistant

- Private Beta, Built and Shipping
