Anurag Kumar Tripathi

AI Product Manager | Technical Product Management | LLM Products

+91 8979975078 · anurag@anuragtripathi.pro · Gurugram, India · Portfolio · LinkedIn · GitHub

Professional Summaries

AI Product Manager with 6+ years of overall experience across software engineering and AI product development, specializing in 0-to-1 LLM-powered products. Founder of Xenriq AI Studio, driving organic growth to 50K+ active users across 74 countries. Experienced in AI product strategy, LLM applications, RAG, model evaluation, and human-in-the-loop systems, with measurable impact on support ticket reduction and self-service adoption.

Skills

AI Product: LLM Feature Strategy, Model Evaluation, Prompt Engineering, Output Quality Standards, RAG-based Search, Human-in-the-Loop Design, Generative AI, AI Behaviour Definition

Product Management: Roadmap Planning, MVP Scoping, KPIs/OKRs, Wireframing, Stakeholder Management, Go-to-market Strategy, Feature Prioritisation (RICE, MoSCoW), Discovery, PRDs, Product Strategy, Product Discovery

Analytics: SQL, A/B Testing, Google Analytics, Mixpanel, Funnel Analysis

Technical: Python, Java, Git, REST APIs, Jira, Figma, Supabase

Execution: Agile, Scrum, Sprint Management, Cross-functional Collaboration

Experience

Xenriq AI Studio Remote, India

AI Product Manager, Founder Feb 2025 - Present

Lead product strategy, AI behaviour, growth, and delivery across four AI products.

- **Promptive Sentry Chrome Extension**
  - Grew from under 1K to 30K+ users across 74 countries with a 4.7 rating and zero paid acquisition. Featured by Vaibhav Sisinty, Nick Saraev, 100xEngineers, and other creators.
  - Defined three core capabilities for Claude, ChatGPT, and Gemini users: prompt enhancement, cross-platform context memory, and usage limit tracking.
  - Built trust into the product: local-first, no account, no data selling. Kept it fully free through growth to 30K+ users.
- **Jilipy AI Chrome Extension (Pre-launch)**
  - Leading end-to-end development of Jilipy, an AI side panel for Chrome that summarizes and answers questions on webpages, YouTube videos, and PDFs, and generates notes, translations, and professional diagrams.
  - Own AI product decisions end to end: model selection, output quality standards, and cost guardrails that keep the product sustainable at scale.
  - Defined the product vision, target users, and positioning as the trust-first alternative to Merlin AI and LINER, with transparent usage limits and no advertising.
- **Promptive Sentry for IDEs and Firefox**
  - Reached 5K+ active developers across all major IDEs like VS Code, Cursor, Windsurf, and Antigravity through organic growth alone.
  - Built a 7-layer context pipeline (under 800ms) that cuts prompt iteration time by 60%. Extended the product to Firefox on a shared backend.
- **Piqque, Open Source Windows AI Assistant**

-
    - Built and open sourced Piqque, a Windows AI assistant that sees the screen, points to the exact element with an animated cursor, and responds to push-to-talk voice, across Claude, Gemini, and OpenAI models.
    - Engineered a complete voice loop: global push-to-talk hotkey, streaming transcription under 200ms, and tiered speech output (local Kokoro, ElevenLabs, offline Windows fallback) that keeps working without network or paid services.

Aithent Technologies Gurugram, India
Senior Software Engineer Dec 2022 - Sep 2023
Worked at the intersection of engineering and product, contributing to LLM-assisted user-facing features and owning the evaluation framework that measured their real-world performance

- Partnered with product and design to launch an LLM-assisted help search with suggested answers, reducing support tickets by 12% and increasing self-service usage by 10%.
- Built a model evaluation framework using click-through rate, helpfulness ratings, and fallback frequency to improve grounding and prompts.
- Reduced recurring incidents by 14% through monitoring, SLOs, and structured incident review processes.

Xoriant Solutions Pvt. Ltd. Gurugram, India
Software Engineer Nov 2021 - Dec 2022

- Owned delivery of an intelligent spending categorisation and trend analysis feature that reached 20% DAU within 3 months, becoming a top-3 engagement driver on the platform.
- Partnered with PMs to define PRDs, user stories, and acceptance criteria, ensuring delivery aligned with product strategy.

Hexaware Technologies Gurugram, India
Associate Software Engineer Jun 2019 - Nov 2021

- **Improved customer outcomes:** Synthesized insights from user interviews, support tickets, and surveys to sharpen backlog prioritisation, contributing to a 20% improvement in CSAT scores and improving user retention.
- Designed and deployed real-time KPI dashboards (Java, SQL) that improved operational efficiency by 30% and enabled data-driven stakeholder decisions.

IBM Bangalore, India
Engineering Intern Jun 2018 - Aug 2018

- Contributed to an ERP platform integrating educational asset and event management across a multi-partner environment; supported backend logic and performance optimisation.

EDUCATION

University of Petroleum and Energy Studies, Dehradun, India Jul 2015 - Jun 2019
B.Tech in Computer Science and Engineering
